PAGES BLOCKED FROM SEARCH

Why are these pages not indexable/non searchable on Google?

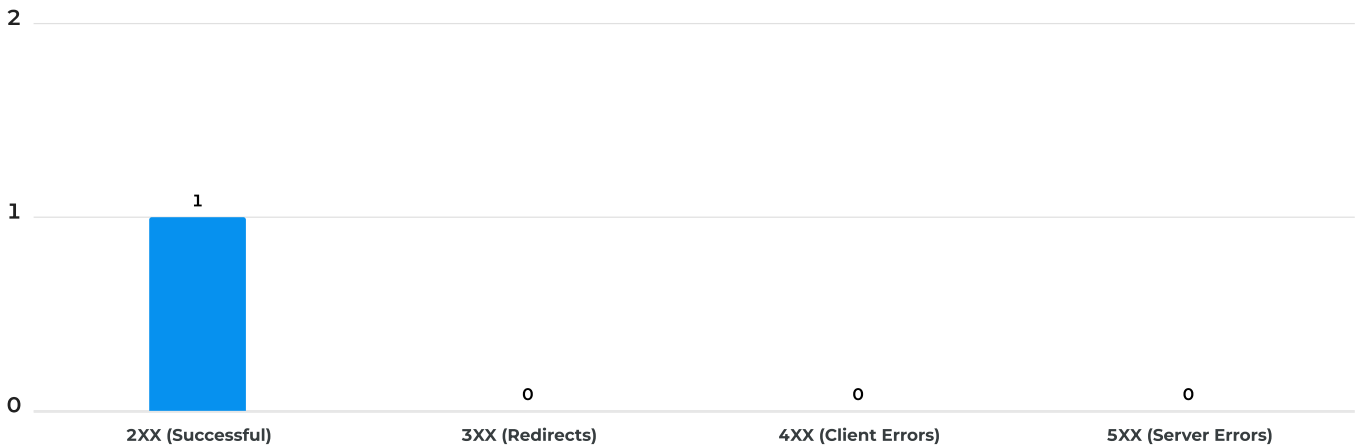

Pages that are marked as "non-indexable" cannot appear in Google search results.

STATUS CODE REPORT

Understand How Status Codes Impact SEO

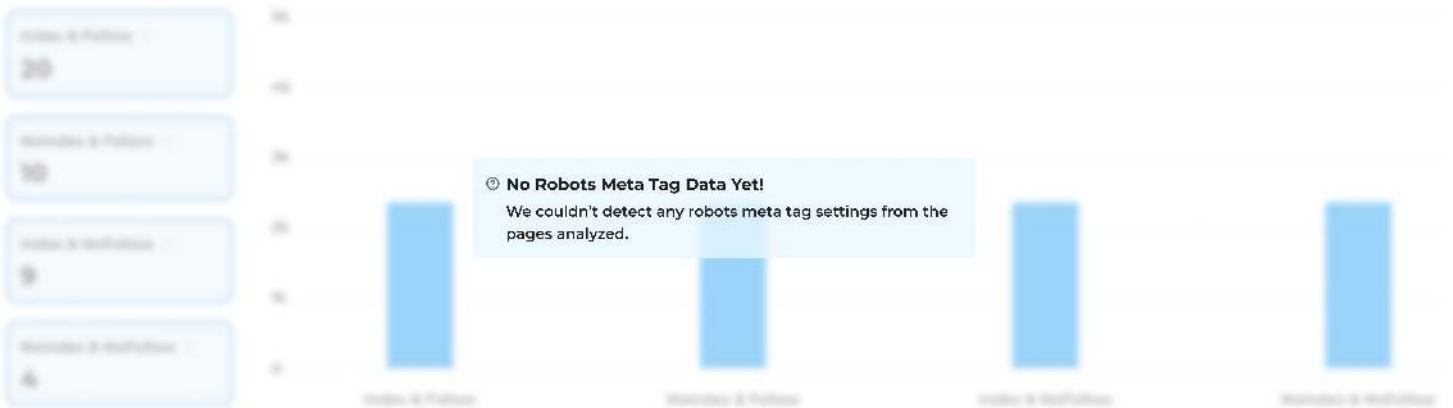

Different HTTP status codes (2xx, 3xx, 4xx, 5xx) tell search engines how your pages respond. Too many errors or redirects can hurt your crawlability and rankings.

CRITICAL ISSUES

1. Missing H1

A missing `<h1>` tag means the page lacks a clear main heading or title, which can negatively impact SEO and user experience.

 Headers  Critical  Medium

What Triggers This Issue ?

If the page doesn't contain an `<h1>` tag, search engines might have difficulty understanding the primary topic of the page, leading to potential indexing issues.

How can I Resolve it ?

Add an `<h1>` tag at the top of the page that clearly identifies the main topic or purpose of the page.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyyaesthetics.com/>

 This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

2. Missing Canonicals

The canonical tag is missing from a page, which means search engines may not know which version of the content to index.

Canonicalization

Warning

High

What Triggers This Issue ?

This occurs when there is no `<link rel="canonical" href="URL">` tag in the `<head>` section of a page.

How can I Resolve it ?

Add a `<link rel="canonical" href="URL-of-preferred-version">` tag to the `<head>` section of the page to indicate the preferred URL to search engines.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyyaesthetics.com/>

? This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

3. Missing Meta Description

The page does not contain a meta description tag.

 Titles & Metas

 Warning

• Medium

🔍 What Triggers This Issue ?

If a meta description is missing, search engines will often pull text from the page content to use in search results. This text may not be as optimized or relevant as a custom meta description, potentially leading to lower click-through rates.

✅ How can I Resolve it ?

Add a relevant and unique meta description to every page. The description should summarize the content, be between 150-160 characters, and include relevant keywords. It should also encourage users to click through from search results.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyaesthetics.com/>

🔍 This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

4. Missing X-Content-Type-Options Header

The X-Content-Type-Options header is missing, which could lead to MIME-sniffing attacks. This header prevents browsers from interpreting files as a different content type than what is declared.

 Content Quality  Warning  Low

? What Triggers This Issue ?

Without this header, browsers may try to automatically detect content types, which could lead to security vulnerabilities, such as executing malicious scripts.

✓ How can I Resolve it ?

Implement the X-Content-Type-Options header with the value nosniff. Example: X-Content-Type-Options: nosniff.

TOTAL PAGES AFFECTED (3)

PAGES

-  <https://nypunyyaesthetics.com/>
-  <https://nypunyyaesthetics.com/static/js/main.7c173ce5.js>
-  <https://nypunyyaesthetics.com/static/css/main.505d14a8.css>

? This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

5. Missing HSTS Header

HTTP Strict Transport Security (HSTS) is missing from the website. This header tells browsers to only connect to the site using HTTPS, preventing downgrade attacks.

 Crawling & Indexing Warning Low**? What Triggers This Issue ?**

Without HSTS, an attacker could force a downgrade from HTTPS to HTTP, which exposes sensitive data to man-in-the-middle (MITM) attacks.

✓ How can I Resolve it ?

Add the Strict-Transport-Security header to your web server configuration to ensure that all connections to your site are made over HTTPS only. Example: Strict-Transport-Security: max-age=31536000; includeSubDomains.

TOTAL PAGES AFFECTED (3)**PAGES**

-  <https://nypunyyaesthetics.com/>
-  <https://nypunyyaesthetics.com/static/js/main.7c173ce5.js>
-  <https://nypunyyaesthetics.com/static/css/main.505d14a8.css>

? This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

6. Missing X-Frame-Options Header

The X-Frame-Options header is missing, which prevents your site from being embedded in an iframe or frame, preventing clickjacking attacks.

 Crawling & Indexing Warning Low**? What Triggers This Issue ?**

When this header is not set, malicious websites can embed your site within an iframe and potentially trick users into clicking something they didn't intend.

✓ How can I Resolve it ?

Set the X-Frame-Options header to DENY or SAMEORIGIN to prevent the site from being embedded. Example: X-Frame-Options: DENY.

TOTAL PAGES AFFECTED (3)**PAGES**

-  <https://nypunyyaesthetics.com/>
-  <https://nypunyyaesthetics.com/static/js/main.7c173ce5.js>
-  <https://nypunyyaesthetics.com/static/css/main.505d14a8.css>

? This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

7. Missing Content-Security-Policy Header

The Content-Security-Policy (CSP) header is missing, which is used to prevent a wide range of attacks such as cross-site scripting (XSS), clickjacking, and data injection.

 Crawling & Indexing

 Warning

 Low

? What Triggers This Issue ?

Without CSP, the website may be vulnerable to malicious code execution, including data injection and XSS attacks.

✓ How can I Resolve it ?

Implement a robust Content-Security-Policy header to restrict the sources from which content like scripts, styles, and images can be loaded. Example: Content-Security-Policy: default-src 'self'; script-src 'self' https://apis.google.com.

TOTAL PAGES AFFECTED (3)

PAGES

 https://nypunyyaesthetics.com/

 https://nypunyyaesthetics.com/static/js/main.7c173ce5.js

 https://nypunyyaesthetics.com/static/css/main.505d14a8.css

? This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

8. Missing Secure Referrer-Policy Header

The Referrer-Policy header is missing or improperly configured. This header controls how much information is sent with HTTP requests that link to other pages, and without it, sensitive data (like full URLs) may be sent as referrers.

 Crawling & Indexing Warning Low

What Triggers This Issue ?

The absence of this header could leak sensitive data to external websites via referrer headers, which can be a security risk.

How can I Resolve it ?

Implement the Referrer-Policy header with a restrictive policy. Example: Referrer-Policy: no-referrer-when-downgrade.

TOTAL PAGES AFFECTED (3)

PAGES

 <https://nypunyyaesthetics.com/> <https://nypunyyaesthetics.com/static/js/main.7c173ce5.js> <https://nypunyyaesthetics.com/static/css/main.505d14a8.css>

 This report shows only key highlights. Check [Infigrowth](#) for full details.

WARNING ISSUES

9. Missing H2

Missing <h2> tags on a page can lead to disorganized content, making it harder for search engines to interpret the page structure and for users to navigate.

 Headers

 Warning

 Low

What Triggers This Issue ?

If a page lacks <h2> tags, it may indicate that the page's content is not well-organized, or there may be insufficient subheadings for sections.

How can I Resolve it ?

Add <h2> tags to break down content into logical sections and improve the page's structure. Use <h2> for secondary headings that support the main topic.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyyaesthetics.com/>

 This report shows only key highlights. Check [Infigrowth](#) for full details.

OPPORTUNITY ISSUES

10. Pages Without Internal Outlinks

Pages that do not contain any internal links to other pages within the same website.

 Internal Linking  Opportunity  High

What Triggers This Issue ?

A page with no internal outlinks makes it harder for search engines to crawl other pages on the site, potentially isolating the page and reducing its visibility in search engine results.

How can I Resolve it ?

Ensure that every page has at least one internal outlink, which will help search engines discover other pages on the website. A solid internal linking structure benefits both SEO and user navigation.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyyaesthetics.com/>

 This report shows only key highlights. Check [Infigrowth](#) for full details.

OPPORTUNITY ISSUES

11. Low Content Pages

Low-content pages have very little text, media, or overall content, providing minimal value to users or search engines.

Content Quality Opportunity Medium

What Triggers This Issue ?

Pages with insufficient content, such as ones with just a few sentences, large amounts of white space, or very little information.

How can I Resolve it ?

Improve these pages by adding more detailed, relevant, and engaging content to make them useful for users and searchable by search engines.

TOTAL PAGES AFFECTED (1)

PAGES

 <https://nypunyyaesthetics.com/>

? This report shows only key highlights. Check [Infigrowth](#) for full details.

OPPORTUNITY ISSUES

12. Below 30 Characters

The page title is too short, containing fewer than 30 characters.

 Titles & Metas

 Opportunity

 Medium

❓ What Triggers This Issue ?

Titles that are too short may not effectively describe the page's content or include necessary keywords. They can also appear generic or incomplete in search results, which can harm user engagement.

✅ How can I Resolve it ?

Ensure that the page title is sufficiently descriptive, ideally between 50-60 characters. Include relevant keywords that reflect the page content while maintaining clarity and appeal for users.
